

Does android have software updates

Continue

What is a software update for android. Are android updates free.

We all need apps to run properly for us, regardless of which apps we have on our phones and how often we use them. That's why keeping them updated is vitally important since without installing new versions, our apps may stop working or may end up posing a security threat. Fortunately, this article explains how to update apps on Android. It covers how to update apps on Android individually and how to update them automatically. Contents How to manually update apps on Android Automatic updates Looking for some interesting new apps? Check out our article on the best Android apps available now. How to manually update apps on Android Let's say you're aware that some of your apps have just had new versions released, but you don't think your Android phone has them installed. Well, you can install new app updates by doing the following: Step 1: Open the Google Play Store. Step 2: Tap the Menu button in the top-left corner of the screen (it's on the left of the search bar and looks like three horizontal lines on top of each other). Step 3: Tap My Apps & Games. The updates tab will open by default; it will display any apps that have updates available. Step 4: Tap Update. Well done, your apps have now been updated. If there aren't any updates available for any of your apps, you'll see No Updates Available under the Updates tab in the My Apps & Games menu. Automatic updates Assuming that you have neither the time nor the inclination to manually update apps, you can choose to update them automatically. Automatic updates should be turned on by default, but in case they aren't, here's what you can do. Step 1: Open the Google Play Store. Step 2: Tap the Menu button in the top-left corner of the screen (it's on the left of the search bar and looks like three horizontal lines on top of each other). Step 3: Tap Settings. Step 4: Tap Auto-Update Apps, and then choose one of the available options (Over Wi-Fi Only is recommended). Finally, tap Done. Your apps will now update automatically as and when new versions are released by developers. However, assuming you don't want to automatically update all of your apps, you can instead opt to update only specific apps (like those you use most often). Make sure that you have auto-update apps turned off (follow the steps above, but then tap Don't Auto-Update apps at the end), and then do the following: Step 1: Open the Google Play Store. Step 2: Enter the name of the app you want to auto-update in the Search for Apps & Games bar. Search for it, and once it appears, tap on it. Step 3: Tap the More button in the top-right corner of the screen. Tap Enable Auto-Update. Repeat this process for as many apps as you'd like to auto-update. Editors' Recommendations BlackBerry rolled out a major software update on Thursday, allowing users of its entire suite of BlackBerry 10 devices such as the Z10, Q10 and Z30 to access Android applications, and a host of other features, including Blend. The company said the BlackBerry 10 OS 10.3.1 gives users the ability to access both the BlackBerry World appstore and the Amazon Appstore that provides access to a host of Android applications previously unavailable on the BlackBerry platform. In addition, BlackBerry said the new software will allow its users to access its new BlackBerry Blend feature that impressed many, when it was unveiled last year. The Blend feature lets users get message notifications, read and respond to work and personal email, text and other messages, while also accessing files, calendars, contacts and other media, on whatever device one is using. It works across a host of operating systems including Apple's Mac OS, Microsoft's Windows platform and tablets powered by Google Inc's Android software. The software upgrade will also introduce the new BlackBerry Assistant, a digital assistant that can be used with voice or text command to help users manage email, contacts, calendar and other applications. It rivals offerings such as Apple's Siri and Samsung's S Voice. BlackBerry said subject to carrier approvals, the software upgrade will begin to roll out to customers around the world, starting Thursday. (Reporting by Euan Rocha; Editing by David Gregorio) Meet the Dermatologist Who Wants to Save You Money — and Just Hit a \$200 Million Milestone for Patients Your Employees Want This Perk, and Giving It to Them Can Improve Your Bottom Line The Hidden Dangers of Not Taking Your Vacation Days This Family-Owned Manhattan Jewelry Shop Struggled to Rebuild After 9/11. Today, 2 Sisters Who Run the 46-Year-Old Business Reveal What It Takes to Persevere. Businesses Need More Women Investors. Here's How That Can Happen. Franchising Isn't for Entrepreneurs, and Google could surprise us given the work on its in-house Whitechapel chipset. For now, we will have to wait until October to hear anything official as Prosser says that's likely when the devices will be announced. I'm starting to think the HomePod needs its own app. To control software update, volume, eq, Siri, etc. All within one app, rather than being split across 3 places as it is now. Score: 9 Votes (Like | Disagree) Android 11 is here. The new mobile operating system isn't necessarily as groundbreaking as some previous updates, but it still brings several new privacy features, as well as some visual changes that should make accessing things like smart home devices a whole lot easier. Of course, you might be wondering exactly when your phone is getting Android 11. The good news is that Android 11 is coming to more devices week by week. The bad news is that even months after it debuted, some phones still haven't received the update or only have early betas available. Still, some big names have rolled out the update to popular models — hopefully including the one in your hand. Here are all the phones confirmed to get Android 11, and others we expect to get the update eventually. Android 11 on Asus phones Asus has joined the Android 11 beta program, however, there are currently only two eligible devices — the Asus Zenfone 6 and the Asus Zenfone 7 Pro. Still, more devices will likely join the beta as time goes on. Asus phones that have the Android 11 beta Asus Zenfone 6 Asus Zenfone 7 Pro Android 11 on Black Shark phones Black Shark is essentially Xiaomi's gaming phone brand, and alongside Poco, Redmi, and actual Xiaomi phones, the company also shared which Black Shark phones will get the update. Here's the list. Black Shark phones that will get Android 11 Black Shark 3 Android 11 on Google Pixel phones As you would expect, Google Pixel phones are among the first to get Android 11 — however, not all Pixel devices will get the update. The original Pixel and Pixel XL won't get any updates beyond Android 10, but considering that the original Pixel is now four years old, that's not necessarily unexpected. As you might guess, the new Pixel 4a 5G and Pixel 5 ship with Android 11. Google Pixel phones that have Android 11 Google Pixel 2 and Pixel 2 XL Google Pixel 3 and Pixel 3 XL Google Pixel 3a and Pixel 3a XL Google Pixel 4 and Pixel 4 XL Google Pixel 4a Android 11 on LG phones LG is finally beginning to roll out Android 11, but only in certain regions. We expect most of LG's recent phones to get the update eventually, including the V50, G8, and G8X. We'll have to wait and see just how long it takes these phones to get the update, but it may be at least a few months. LG phones that have Android 11 Android 11 on Microsoft phones OK, so there's only one Microsoft phone that could get Android 11, but recent reports indicate that users might have to wait a while. The Microsoft Surface Duo will reportedly get the Android 11 update "this summer," according to a report from German outlet Dr. Windows. Microsoft phones to get Android 11 Android 11 on Motorola phones Motorola has finally announced the first of its devices to get Android 11, and we're expecting a number of the company's other phones to get the build soon too. The rollout is starting with the Moto G Pro, which is also known as the Moto G Stylus in the U.S. Unfortunately, the Moto G Pro is part of Android One — but the Moto G Stylus isn't, so it may be a while before the U.S. version of the device gets the update. Motorola has promised the update to the Motorola One 5G too. Generally speaking, over the past few years, Motorola has been a little lax with Android updates, so even if you do have a recent Motorola device, it may be a while before you get Android 11. Eventually, we expect the Motorola Edge, Edge+, Moto G Series, and Motorola Razr to get the update. Motorola phones that have Android 11 Moto G Pro Moto G8 and Moto G8 Power Android 11 on Nokia phones Nokia has announced which devices will get Android 11, and when they'll get it. The good news is that most of Nokia's recent devices will get the update. The bad news, however, is that it may take some time for some of them. Here's the full list. Nokia phones that have Android 11 Nokia 2.2 Nokia 2.3 Nokia 4.2 Nokia 8.1 Nokia 8.3 Nokia phones that will get Android 11 Nokia 1 Plus (Q2 2021) Nokia 1.3 (Q1 2021) Nokia 2.4 (Q1 2021) Nokia 3.2 (Q1-Q2 2021) Nokia 3.4 (Q1 2021) Nokia 4.2 (Q1 2021) Nokia 5.3 (Q4 2020) Nokia 6.2 (Q1-Q2 2021) Nokia 7.2 (Q1-Q2 2021) Nokia 9 PureView (Q2 2021) Android 11 on OnePlus phones OnePlus has been on top of updates recently, too — and some OnePlus phones were among the first devices to get Android 11. A number of OnePlus phones now have Android 11, with OnePlus' Android skin over the top of it. OnePlus phones that have Android 11 OnePlus Nord OnePlus 7 and 7 Pro OnePlus 7T and 7T Pro OnePlus 8 and 8 Pro Android 11 on Oppo phones Like OnePlus, Oppo is also part of the Android 11 beta, and several Oppo phones are getting the beta alongside the stable release to Pixel devices. Oppo has a more customized version of Android called Color OS, and it may take some time for the company to iron out all of the bugs, so we'll have to wait and see. Oppo phones that have Android 11 Oppo Find X2 and X2 Pro Oppo F17 Pro Oppo Reno Z Oppo Reno 3A Oppo A91 Oppo phones that have the Android 11 beta Oppo Reno 3 4G Oppo Reno 3 Pro 4G Oppo Ace 2 Oppo phones that will get Android 11 Oppo has released the names of other phones that should get Android 11, too. Here's a rundown of those phones. Oppo Reno 4 5G, Reno Pro 4 5G, Reno 4 Pro 4G Oppo F11, F11 Pro, F11 Pro Avengers Edition Oppo A9, A92, A72, A52, A5 2020, A9 2020 Oppo Reno 10x Zoom Oppo Reno 2, 2F Oppo Reno 3 Pro 5G Oppo F15 Oppo Reno, Reno Z Android 11 on Poco phones Xiaomi-owned Poco will be pushing Android 11 to some of its phones, too. Here are the phones we know will get Android 11 so far. Poco phones that will get Android 11 Poco F2 Pro Poco X2 Poco M2 Pro Android 11 on Realme phones Realme is also running an Android 11 beta program, but only one phone is part of the beta — the Realme X50 Pro. Hopefully, more phones will be added to the list as time goes on. Realme phones that have the Android 11 beta Android 11 on Redmi phones Along with the list of Xiaomi-branded phones, the China-based manufacturer also shared a list of Redmi phones that will get the new operating system. Here are the phones that we know will get it so far. Redmi phones that have Android 11 Redmi phones that will get Android 11 Redmi K30, K30 Pro, K30 5G, K30i 5G Redmi K20, K20 Pro Redmi Note 9, Note 9 Pro, Note 9 Pro Max Redmi 10X, 10X 5G Redmi 9, 9C, 9A Android 11 on Samsung phones Samsung has been ahead of schedule with its rollout of Android 11, and as a result, most of its flagship devices from this year and last now have the Android 11 update. The timing of the update will depend on your region, but all regions should be getting updates on the phones below. Samsung phones that have Android 11 Samsung Galaxy S20, S20+, S20 Ultra, and S20 FE Samsung Galaxy S10, S10+, S10e, and S10 Lite Samsung Galaxy Note 20 and Note 20 Ultra Samsung Galaxy Note 10 and Note 10+ Samsung Galaxy Fold and Z Fold 2 Samsung Galaxy Z Flip Samsung Galaxy A70 Samsung Galaxy A21s Samsung Galaxy A51 Samsung Galaxy A12 Samsung Galaxy A02s Android 11 on Xiaomi phones Finally, there's Xiaomi, which was among the first companies to join the Android 11 beta program. Android 11 is rolling out to some Xiaomi phones through MIUI 12, but the eventual MIUI 13 update is expected to be based on Android 11, too. Xiaomi has shared a full list of phones that will get Android 11, with some already offering the update. Here's the list. Xiaomi phones that have Android 11 Xiaomi Mi 10 Xiaomi Mi 10 Pro Xiaomi Mi A3 Xiaomi phones that will get Android 11 Xiaomi Mi Note 10, Mi Note 10 Pro, Mi Note 10 Lite Xiaomi Mi 9, Mi 9 Pro 5G, Mi 9 SE, Mi 9 Lite Xiaomi Mi 9T, Mi 9T Pro Editors' Recommendations
